ASL ROLE SHIFTING: “He Said, She Said...”

Role-Shifting is so much more than that being narrator. Become the role of different people to tell the story! It is important for the audience to tell which character is speaking! The workshop will focus on ASL storytelling techniques for: 1) developing story characters, 2) using role shift, eye gaze, and spatial referencing 3) identifying speakers, shifting between speakers, and matching speakers' affect, and 4) understanding the difference between the storytelling and discourse. Participants will have hands-on practice with the material presented in the workshop, and will receive feedback on their ASL performance exercises.

ASL SEMANTICS: Precision of Expression in ASL

Semantics is defined as the study of meanings expressed by the elements of a language or a combination of the elements. A concept expressed in an ASL sign often cannot be conveyed by a single all-purpose English word. Likewise, English words and phrases may have variations in meaning, which require translations using different ASL signs. This workshop helps the student advance skills in translating the languages of ASL and English.
